

NHAIS Interlibrary Loan System library profiling surveys MUST be completed online.

**Links to the online surveys are at
<https://www.nh.gov/nhsl/nhais/nhaisillsystem.html>**

This print version is provided for planning purposes only.

SIP2 Configuration Survey for NH ILL

Contact Information

If you chose to contribute holdings to the NHAIS ILL System via Option 1 - Z39.50 you may also be able to allow your patrons to log into NHAIS ILL using the library barcode you assigned them to initiate their own ILL requests (which you can then mediate).

The SIP2 protocol passes your library's patron information to the SHAREit software used for NHAIS ILL. SHAREit will impose the patron login requirements and apply patron blocks, as defined in your local ILS. You may need to contact your ILS vendor directly for answers to these questions.

* Full Name of your Library:

* HSA code of your Library (if unsure check the [code list by town](#))

Which system is currently in use in your library?

SIP2 Configuration Survey for NH ILL

General SIP2 Information

* Is your library's SIP2 server hosted by your ILS vendor?

☐ Yes

☐ No

* SIP2 server IP address

* SIP2 Port Number

* Does your library's SIP2 server require a login?

☐ Yes

☐ No

Login Information

If your SIP2 server requires a UserID and Password, provide that information below

UserID:

Password:

* Location Code

This is the code with which your ILS identifies your library; it is usually a few characters and is probably different from your NHAIS identification code.

* Do patrons enter both barcodes and PINS to access resources authenticated via SIP2?

☐ Yes

☐ No

☐ It varies (please explain)

* Should patrons with blocks in your local ILS be blocked from logging in to the NHAIS ILL System?

☐ Yes

☐ No

Supported Blocks

Use the following questions to indicate which patron status element can be included in SIP2 communication. The patron status element is a 14-character fixed-length field with values that determine if a patron is blocked from performing SIP-based transactions. Each position is either 'Y' (true) or blank (false) for a specific status.

Auto-Graphics supports positions 1-4. Please indicate whether your local ILS supports the following SIP2 patron blocks. Blocks are listed by their position in the patron status element of SIP2 communication. You may need to contact your ILS vendor directly for answers to these questions.

* Position 1: Checkout denied

☐ Supported

☐ Not supported

* Position 2: Renewal denied

☐ Supported

☐ Not supported

* Position 3: Recall denied

☐ Supported

☐ Not supported

* Position 4: Hold denied

☐ Supported

☐ Not supported

SIP2 Configuration Survey for NH ILL

Testing

Create the following patron records for testing purposes. Test records must include name, full address, and contact method. These records will be used to confirm patron statuses (e.g. okay, expired, blocked because of too many overdue loans, blocked because of too many fines) are applied correctly by the NHAIS ILL System.

DO NOT SUBMIT REAL PATRON RECORDS FOR TESTING: STATUSES OF REAL RECORDS MAY CHANGE BEFORE TESTING IS COMPLETE.

* These patron test records have been created in our system:

Barcode of unblocked, unexpired test record

PIN of unblocked, unexpired test record

Barcode of test record that is blocked (for any reason, overdues, fines, whatever)

PIN of test record that is blocked

SIP2 Configuration Survey for NH ILL

Thank you!

The information you have provided will help us get your library set up as a participant in the new NHAIS ILL System.

In addition to this SIP2 survey a *NH ILL Profile Survey* and a *Z39.50 Configuration Survey* should have also been completed by your library. Visit <https://www.nh.gov/nhsl/nhais/nhaisillsystem.html> for details and to find the links to the relevant surveys.

It would be very helpful if all the surveys for your library are completed on the same day.
